ABOUT OUR NETWORK

ClickitGolf was developed with the overall health of the golf community in mind. **We connect golfers with courses** and deliver them the best possible savings, while filling the tee sheets for courses looking to draw in more players. **It's a win, win!**

ClickitGolf is consistently communicating with our golfers who rely on us for golf course specials, discounts on products and information on products and services from our advertisers. The reach and demographics of our golfer is vast, covering the USA, Canada with expansion to golfers in Europe and Asia. Although ClickitGolf is a national platform, our data is locally segmented providing our advertising a higher return on investment with better reach to regional and local golfers. We have data of golfers who have made a golf-related purchase within the past 12 months plus golfers who have expressed their "like" for golf having played at least twice in the past year.

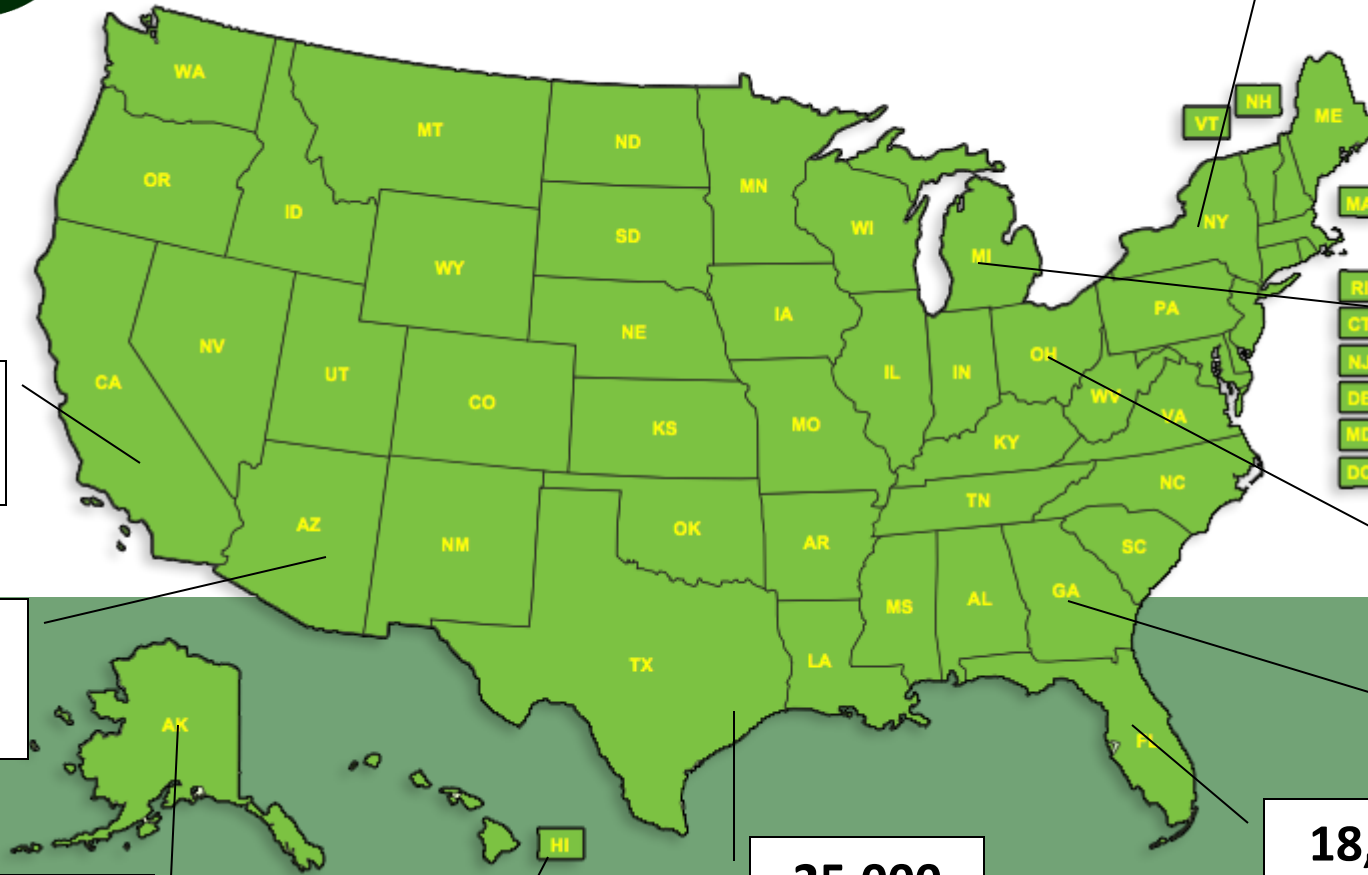

In addition to our database of over 1MM golfers, our technology and social media team are connecting daily with new golfers who are joining ClickitGolf. Welcome to the ClickitGolf Family!
